

Name : Jeyakannan L

Course : Software Engineering

Reg No : 192525376

Experiment – 9

Question : Create a Scrum Project in Jira.

- **Add a backlog with at least 5 items (e.g., "Create user registration page", "Develop API for login").**
- **Prioritize the backlog and create a 1-week sprint.**
- **Move backlog items into the sprint and start the sprint.**
- **Finally show the Screenshot of the sprint board at the start and end of the sprint.**

Link :

Step 1: Open Jira

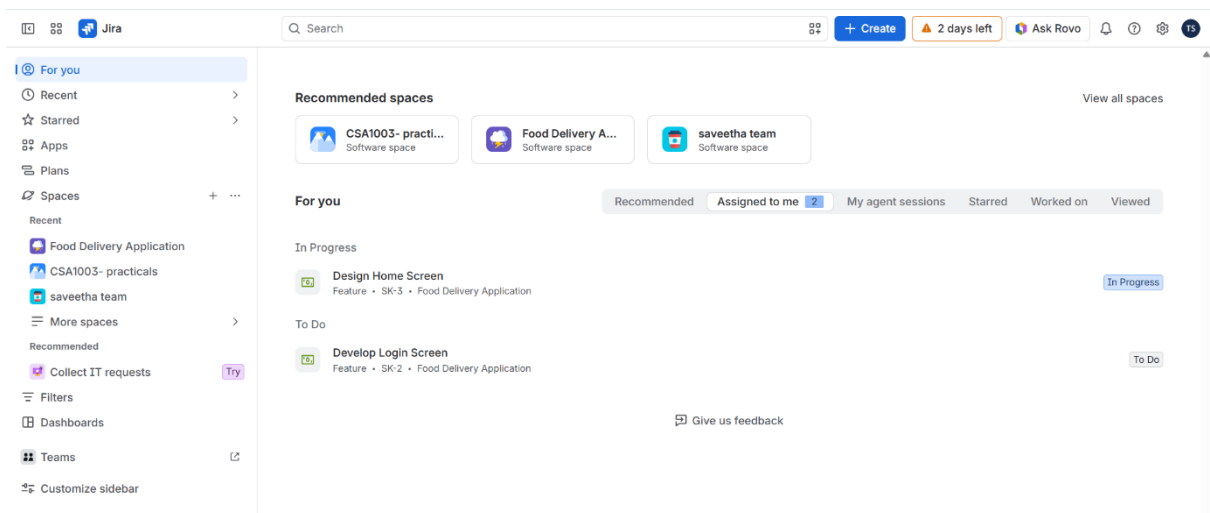

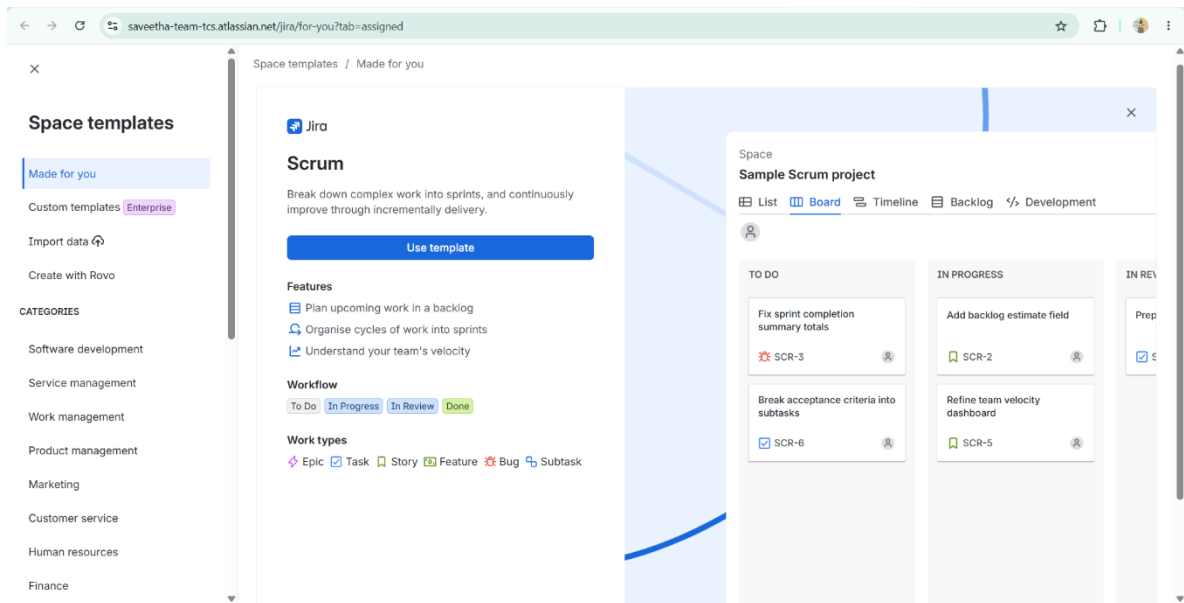

Figure : Home Page of Jira

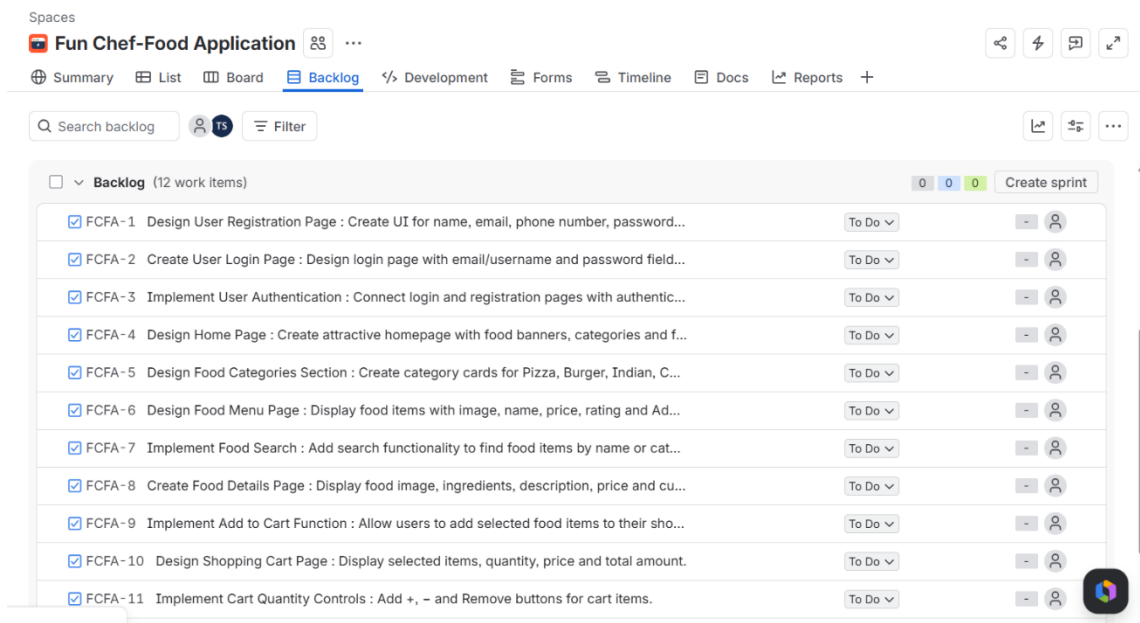

Step 2: Create a Scrum Project

Go to spaces and click the Scrum template , and then follow up the instructions and create the Scrum.

Step 3: Create Backlog Items

- Enter a short description if required.
- Click Create for each item.

Step 4: Prioritize the Backlog

- Arrange the backlog items according to their importance.
- The most important item should be placed at the top of the backlog.

Step 5: Create a 1-Week Sprint

1. Go to the Backlog page.
2. Click Create sprint.
3. A new sprint will appear.
4. Rename it as: Sprint 1 – User & Shopping Features
5. Set the sprint duration to 1 week.

✕

Edit sprint: FCFA Sprint 1

Required fields are marked with an asterisk *
